Items Not Accepted

- Alkaline Batteries (non-rechargeable batteries go out with the trash)
- Medical Waste (West Lafayette Police Dept. 775-5200)
- Explosive Materials
- Asbestos
- Latex Paint (unless lead is listed on ingredient list. See how to dry.)
- Oxidizers

Toxic Leftovers

Don't pour, dump or trash toxic, flammable, or corrosive products. This can harm people and pollute our land, air, water and wildlife. Bring unwanted pesticides, weed killer, acids, mercury, paint thinner, furniture polish, etc. to Tippecanoe County Solid Waste Management.

How do I dry latex paint for disposal?

Read the label.

Oil based/Alkyl/Combustible clean up with mineral spirits. Non-latex paint should be disposed of at the Tippecanoe County Solid Waste Management site.

For Latex Acrylic, clean up with soap and water. Pour cheap clay cat litter or "oil dri" in the can on a 1:1 ration and stir. It will dry in a day or two. Leave the lid off and set out with the regular trash. If sanitation workers can't see it is dry they won't pick it up.

What if I have full cans of latex paint?

If the paint is still usable, it can be donated to the Habitat Restore located at 3815 Fortune Dr., Lafayette. Call 423-2585 for more information.

OR

Line a cardboard box with a trash bag, pour "oil dri" or cheap clay cat litter in the box, then half the can of paint on top. Fill the half-full can with cat litter. Stir both and let dry for a day or two. Set out for the regular trash with the lid off.

How Do I Dispose of Hazardous Items?

ANTIFREEZE

Best Way Disposal
